DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Simic US 4,026,719.
4. This patent shows the modification of sulfur through polymerization with modifiers, see column 4 line 55 through column 5. The incorporation of the claimed aggregate material is disclosed at column 6 lines 38+. The patent appears silent as to the weight ratio of metal to oxide. This limitation is presumed to be met by this disclosure given that the aggregates are the same compounds and used in amounts that overlap those as claimed. The examples show the claimed ingredients as well. Rejections under 35 USC 102/103 are proper when the art shows all ingredients but for a property limitation. As such, the claims are anticipated and/or obvious from this disclosure.
